CHAPTER 1

Introduction

1.1 Introduction

The goal of this project is to implement a large piece of software and develop web-based search engine. Several software development tools and techniques have been used: version control(Git), testing (JUnit), debugging, documentation (Javadoc), benchmarking, build tools (Gradle), and code review. The following chapters describe the project in detail. Project is broken down into three main parts, Task 1: Fester Queries using an Inverted Index; Task 2: Refined Queries; Task 3: Ranking Algorithms.

Result

This project result in...

CHAPTER 2

Chapter 2: Faster Queries using an Inverted Index

2.1 Introduction

In this section we are evaluating three different approaches... lists, hash map
and tree map
Inverted hash map and tree map...
Runned tests to compare the results, which

2.2 Test result comparison

We compared the results of ... We made sure that that the environmetn when
runnin the different test are as much as possible similar, e.g. no other pro-
gramms running on the machine during the testing, that could affect the test
performance results.
In table 2.1 the result of benchmark can be seen.

Table 2.1: Benchmark results in nanoseconds for three type of indexes and test files

Test Files	SimpleIndex	Inv.IndexHashMap	Inv.IndexTreemap
EnWiki Tiny	72017.780 ns	ns	ns
EnWiki Small	9625105.989 ns	ns	ns
EnWiki Medium	272480512.475 ns	ns	ns

2.2.1 Search Using Lists

2.2.2 Search Usnig Inverted Hash Map

How to reference surce¹.

2.2.3 Search Using Inverted Tree Map

How to reference surce².

APPENDIX A

Test Figure reference

This is a test of the appendix and how to reference to something in it. Below is shown an image which is used for test¹testimage.

¹this is just for testing...`www.test.dk`

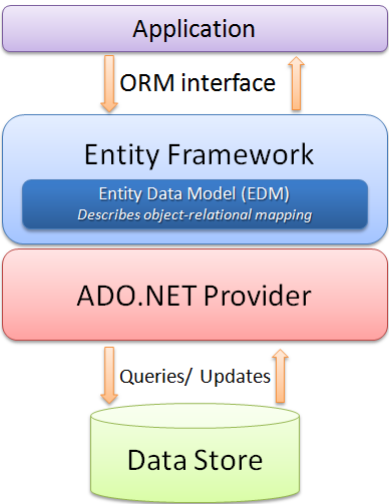

Figure A.1: Microsoft Entity Framework

Test tabel reference

This appendix is a test of creating and referencing a table in latex. In table ?? a example from Peter can be seen. can be seen.

Table B.1: Oversigt over testdeltagerne

Deltager	Navn	Stilling	Rolle
1	Ole Nørrekær Mortensen	Projektleder	Kundeadministrato
2	Allan Booker	Driftsleder	Inspektør
3	Ronni Bing Simonsen	Ingeniør	Kunde

Table B.2: Test af tabel

Column1	Column2
Celle 1	Celle 2
Celle 3	Celle 4

Tabellen har nummer B.2.

En lidt mere avanceret tabel:

I tabel B.3 kan du se hvordan teksten er justeret: l=left, c=centreret og r=right.

Table B.3: Test af tabel2

Celle 1.....	Celle 2.....	Celle 3.....
Celle 4	Celle 5	Celle 6
